

# INTRODUCING LYRICS IN STORIES

Now you and your fans can create stories with lyrics to your music.

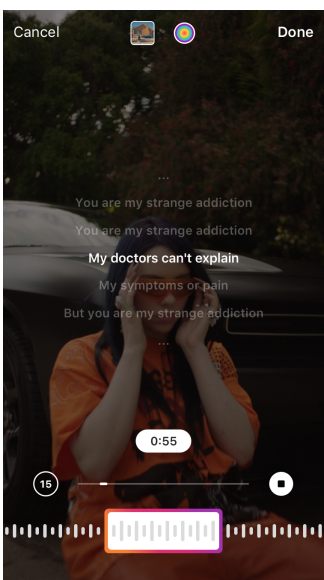

Lyrics in Stories makes it easier for your fans to capture the mood of any moment with your music and lyrics.

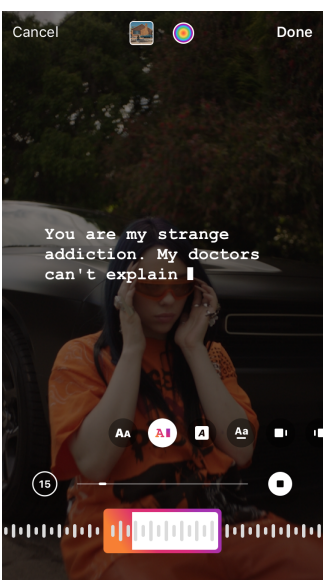

## How it works:

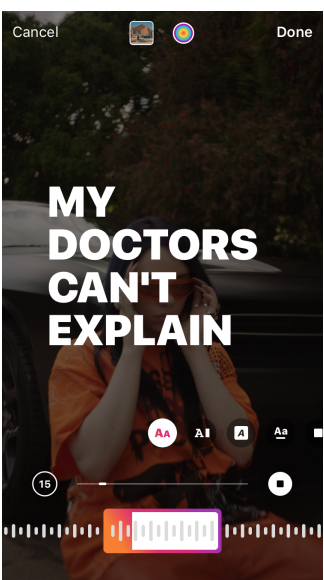

You can add lyrics to your story by selecting the music sticker from the sticker tray after taking a photo or video.

Choose a song and use the scrubber tool to select the part of the song that best captures the moment you're sharing. The scrubber will also enable you to find the lyrics of the exact part of the song you want.

Pick between different lyrics animations, font designs and colors. Move, resize and rotate the lyrics and share to your story.

Fans that watch your story will see the lyrics pop up as the music plays. When they tap on the lyrics, they'll see a sticker with the song title and artist name that links to the artist's Instagram profile.
